SUMMARY

Full-Stack Engineer with expertise in React, TypeScript, and Java Spring Boot. Built Visa's real-time transaction monitoring dashboards adopted by operations teams and architected Tier-0 payment APIs processing **\$500M+ annually**. Specialized in developing responsive, data-intensive frontends and robust, scalable microservices.

EXPERIENCE

Visa Inc.

Austin, TX

Software Engineer

January 2024 – Present

- Built real-time transaction monitoring dashboard in **React 18** with TypeScript, leveraging React Query for server-state management, Recharts for live data visualization, and WebSocket streams; adopted by **3 operations teams** to triage payment anomalies **40% faster**.
- Owned end-to-end CI/CD pipeline with SonarQube and Checkmarx SAST; deployed React and Angular micro-frontends to Kubernetes clusters via Module Federation, maintaining **zero critical CVEs** across all production releases.
- Architected Visa's Tier-0 B2B payment APIs using Java 17 and Spring Boot 3.4, processing **\$500M+ annually** with **99.99% uptime** and **sub-400ms** P99 latency across distributed microservices with OAuth 2.0/JWT, PostgreSQL, and Redis caching.
- Created AI-powered release automation platform using LangGraph multi-agent orchestration, integrating enterprise tools (Jira, Confluence, ServiceNow) via MCP protocol; reduced release documentation time from **8 hours to 15 minutes** across **12+ production releases**.
- Established observability stack (Prometheus, Grafana, ELK) with SLO-based alerting, reducing mean-time-to-detection by **60%** and enabling on-call to resolve issues before customer impact.

Visa Inc.

Austin, TX

Software Engineering Intern

May 2023 – August 2023

- Built internal model-evaluation UI in React with D3.js charts, enabling data scientists to compare ML model performance across datasets; reduced experiment review cycles by **30%**.
- Optimized high-traffic Java API endpoints handling **500+ TPS**, achieving **50% latency reduction** through query optimization, database indexing, and HikariCP connection pooling.
- Developed LSTM neural network using TensorFlow/Keras achieving **95% accuracy** (F1: 0.93) in API anomaly detection, outperforming statistical baselines by **20%** and enabling real-time fraud alerts.

VIZIO Inc.

Dallas, TX

Software Engineering Intern – Embedded Systems

June 2022 – August 2022

- Engineered OTA firmware update system in C/C++ with delta patching and A/B partition failover, reducing update sizes by **70%** and boot times by **20%** across **19M+ globally deployed devices**.
- Developed HAL interfaces and device drivers for ARM Cortex-M microcontrollers, implementing I2C/SPI/UART protocols for peripheral sensors and display controllers.
- Automated firmware builds across 15+ hardware SKUs using Docker and AWS CodePipeline with Coverity static analysis, cutting release preparation time by **50%**.

PROJECTS

CubeVision – Real-Time Rubik's Cube Solver | Python, OpenCV, NumPy, C++

2024

- Built computer vision system achieving **98% color detection accuracy** using HSV segmentation and contour analysis; implemented Korf's IDA* algorithm solving any cube state in under 20 moves.

Portfolio Website | Angular, TypeScript, SCSS, GitHub Pages | ame-cs.github.io

2024

- Designed and developed a responsive personal portfolio site using Angular 17 with standalone components, lazy-loaded routes, and SCSS theming; deployed via GitHub Pages CI/CD with **95+ Lighthouse performance score**.

EDUCATION

The University of Texas at Dallas

Richardson, TX

Bachelor of Science in Computer Science, GPA: 3.82/4.0, Dean's List

January 2022 – December 2023

Austin Community College

Austin, TX

Associate of Science in Computer Science, GPA: 3.95/4.0, Honors

August 2019 – December 2021

TECHNICAL SKILLS

Languages: Java, Python, C/C++, TypeScript, Go, SQL, Bash

Backend: Spring Boot, FastAPI, Microservices, REST/gRPC, GraphQL, OAuth 2.0/JWT, Kafka, RabbitMQ

Infrastructure: AWS (EC2, S3, Lambda, RDS), Kubernetes, Docker, Terraform, PostgreSQL, Redis, MongoDB

Frontend: React, Next.js, TypeScript, Angular, Redux/Zustand, React Query, Module Federation, RxJS

AI/ML: TensorFlow, PyTorch, LangChain, OpenCV, Spark, Pandas
